Portfolio

About Me

4th-year **Computer Engineering** student, holder of the intermediate degree **IT Analyst**, with experience in **data analysis**, **process automation**, and **data pipeline development**.

Currently a **Business Intelligence Intern** at **Cheil Argentina**, supporting Samsung's digital reporting and building **Python (Playwright)** **web scraping pipelines** for price and catalog monitoring across multiple retailers.

Experience

Business Intelligence Intern

Buenos Aires, Argentina

Cheil Argentina

Apr 2026 – present

- Build end-to-end data pipelines in **Python**: web scraping (**Playwright**) and **API** extraction, cleaning in **Pandas**, and loading into a **relational database (SQL)** and data warehouse
- Automate pipeline execution with **Python** and **Windows Task Scheduler**, incorporating **AI models** for catalog matching, enabling daily price monitoring across multiple retailers
- Support Samsung's web traffic and UX reporting, modeling data and building **Power BI** visualizations
- Integrate data from **Google Analytics**, **Facebook Insights**, and other digital tools into the reporting pipeline

Data Analytics Intern

Buenos Aires, Argentina

Grupo Harmony S.A.

Sept 2025 – Mar 2026

- Develop end-to-end data flow: extraction from the **ERP**, modeling via **SQL Server** views, and loading into **Power BI**
- Clean, validate, and transform data using **Power Query**
- Build dashboards, reports, and **KPI** visualizations in **Power BI**, including **DAX** measures
- Maintain dashboards in **Power BI Service**, ensuring data availability and consistency
- Gather requirements with business teams and translate them into **metrics** and data models

Education

Universidad Argentina de la Empresa

Buenos Aires, Argentina

Student in **Computer Engineering**

Mar 2023 – present

- 38 out of 52 courses completed
- Currently enrolled in the 4th year
- Earned the intermediate degree, **IT Analyst**

Technical Skills

Programming Languages: Python, SQL, Java, JavaScript

Automation & Scraping: Playwright, n8n, Power Automate

Databases: SQL Server, MySQL, MongoDB, Cassandra, Neo4J

BI & Analytics Tools: Power BI, Looker Studio, Excel, Git

Languages: English (advanced), Spanish (native)

Projects

Scholarship Management System – Fundación BisBlick (SQL)

Mar 2025 – July 2025

- Design and implementation of a **relational database** to register, update, and analyze scholarship holder data, improving academic and social tracking.
- Use of **SCRUM methodology** and task division by sprints.
- Responsible for creating **DDL** and **DML**, as well as developing **interactive dashboards in Power BI**.
- **Technologies:** SQL Server, Power BI, Agile Methodologies, Collaborative Work
